

# Washing instructions for your curtains

## Before washing

So that the fine fabric structure is not damaged in the washing way, remove please curtains rolling rings, pins, planing hulls, pleated plugs etc. If necessary you had to do the upper curtains or decoration pieces with rolling struggle in a relation. We recommend you to protect the curtain by a sponge bag against too high mechanical load. To avoid crease folds, do not give too many parts in a washing drum. A filling amount should not cross from 12 to 15 sqm with a drum volume between 4 and 5 kg.

**Follow please the washing symbol - etiquettes in the curtain or the furnishing fabric!**

## During washing

Reduce the resting time of your curtains / furnishing fabrics with the washing way by hand to approx. 20 - 25 minutes or use the short washing way or woollen washing way. So that the curtains receive no crease folds, these may never become only briefly fling, please never fling them dry.

## After washing

Take the curtains after the washing way immediately from the washing drum. Decorate the still humid curtains directly near the window without storing occasionally the fine material, you avoid necessarily forming crease places. The folds hang to themselves on the window by itself with your help in form. Should you still show isolated crease places, these can be ironed. Please, follow absolutely the iron temperature given on the iron symbol.

With attention of these nursing tips you will have a lot of joy in your curtains.

## Symbols for the care treatment of textiles

washing					
	not washing	hand laundry	fine laundry	v. fine laundry	fine laundry
	normal laundry	fine laundry	normal laundry	fine laundry	normal laundry
	The numbers in the <b>wash container</b> correspond to the <b>maximum wash temperatures</b> , which may not be exceeded. - The bar underneath the wash container requires for a (mechanically) <b>milder treatment</b> . It marks wash cycles, which are suitable e.g. for wash and wear and mechanically sensitive articles.				
chlorine					
		chlorine bleaching possible	chlorine bleaching not possible		

iron					
	hot iron	normal hot iron	moderately hot iron	do not iron	
chemical cleaning					
		not possible			
tumbler
